Office Action Summary

Art Unit: 1732

DETAILED ACTION

Election/Restriction

1. Applicant's election with traverse of Group I, claims 1-4 and 10 in Paper No. 9 is acknowledged. The traversal is on the ground(s) that examination of both groups would not be a serious burden. This is not found persuasive because there would be a serious burden as shown by the different classification.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 6-9 and 11-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.

Priority

3. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must be copending with the prior application or with an application similarly entitled to the benefit of the filing date of the prior application.

It is noted that earlier application PCT/AT98/00151 published (as WO 98/58103) on December 23, 1998, which is prior to the filing date (February 3, 1999) of the instant application.

Art Unit: 1732

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Stall et al (Stall, U.S. Patent 5,951,933).

Stall (col. 1, line 7 to col. 4, line 67) teaches a process of cellulose fibers as set forth in the instant claims (note especially Examples 9 and 10, which teach a content of 0.5% of a high molecular weight substance).

Allowable Subject Matter

7. Claim 10 is allowable over the prior art references presently of record (claim 10 recites that the high molecular weight substance is cellulose).

Art Unit: 1732

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 5,047,197 teaches a process of making cellulose fibers wherein a high molecular weight substance is used in an amount no greater than 0.01% (and preferably no more than 0.005%).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo Tentoni whose telephone number is (703) 308-3834. The examiner can normally be reached on Monday - Friday from 6:30 A.M. to 3:00 P.M.
